

Jiayin (DJ) Dong

Assistant Professor of Astronomy

1002 W. Green Street, Urbana, IL 61801

✉ jdongx@illinois.edu | 0000-0002-3610-6953 | 🏠 jiayindong.github.io | 📺 jiayindong | 📖 SciX Library

Appointments

Assistant Professor 2025–present
Department of Astronomy, University of Illinois Urbana-Champaign

Flatiron Research Fellow 2022–25
Center for Computational Astrophysics, Flatiron Institute – Simons Foundation

Education

Pennsylvania State University 2017–22
Ph.D. in Astronomy & Astrophysics; Ph.D. minor in Computational Science

University of Illinois Urbana-Champaign 2013–17
B.S. in Engineering Physics and Astronomy (dual degree) with honors

Fellowships & Awards

2022–25 **Flatiron Research Fellowship** Postdoctoral fellowship at CCA, Flatiron Institute
2024 **TD Lee Visiting Fellow** Tsung-Dao Lee Institute Visiting Fellow in Astrophysics
2022 **Alumni Association Dissertation Award** The most prestigious recognition to Penn State doctorate students
2021 **Raynor L. Duncombe Student Research Prize** Awarded by AAS Division on Dynamical Astronomy
2018–20 **Zaccheus Daniel Fellowship (x3)** Penn State travel grants for graduate student research
2020 **CCA Pre-Doctoral Fellowship** Selected as a predoc fellow at CCA, Flatiron Institute in Spring 2020
2019 **Student Poster Competition Winner** at New Horizons in Planetary Systems Conference
2018 **Sagan Workshop Travel Award** Travel support for 2018 Sagan Exoplanet Summer Workshop
2017 **Homer F. Braddock Fellowship** University scholarship awarded to selected 1st-year graduate students
2014–17 **Edmund J. James Scholar** Undergraduate honor program at the University of Illinois

Awarded Telescope Time

As Principal Investigator, I have led 14 observing programs totaling over 50 nights on the WIYN 3.5m, CTIO 1.5m, MINERVA-A, and LCOGT telescopes.

WIYN-3.5m / NEID via the NASA-NSF Exoplanet Observational Research Program (NN-EXPLORE)

2026B, #252341 (co-PI Yan), Priority 1 and 2, **22.2 hours**

2026B, #613455, Priority 0, **15.6 hours**

2025A (**Long Term Program**), #314515, Priority 4, **43.3 hours**

2024B, #774080 (co-PI Eisner), Priority 2 & 3, **2.2 hours**

2024A, #536482, Priority 3, **39 hours**

2023A, #954402, Priority 0, **17.8 hours (NASA WIYN Data Award, \$6,000)**

2023A, #652300 (co-PI Chontos), Priority 0 and 1, **24.4 hours**

2022A, #413894, Priority 1 and 2, **16.7 hours (NASA WIYN Data Award, \$6,000)**

2021B, #0277, Priority 1 and 2, **5 hours**

WIYN-3.5m / NEID via the Penn State TAC

2022B, #836442, Priority 3 and 4, **4.4 hours**

2021B, #0448, Priority 2, **10.5 hours**

2021A, #0405, Priority 1 and 2, **9.6 hours**

2021A, #0406, Priority 2, **4 hours**

CT-1.5m / CHIRON via NN-EXPLORE

2022A, #308148, **50 hours**

2021A, #0147, **60 hours**

2020B, #0189, **20 hours**

MINERVA-A / MINERVA via NN-EXPLORE

2022A, #308148, **20 hours**

2021A, #0147, **40 hours**

LCOGT-1m via NOIRLab

2021A, #0147, **50 hours**

2020B, #0189, **30 hours**

As Co-Investigator on VLT-8m / ESPRESSO, ESO-3.6m / HARPS, TNG-3.6m / HARPS-N, Magellan-6.5m / MIKE, Magellan-6.5m / PSF, WIYN-3.5m / NEID, WIYN-3.5m / NESSI, CHEOPS, XMM-Newton, IRTF / iSHELL, Gemini-N / IGRINS-2

Invited Colloquia, Seminars, Talks

- April 2026 **Colloquium, University of Rochester Department of Physics and Astronomy** "Toward a Unified Framework for Giant Planet Demographics" Rochester, NY
- March 2026 **Astronomy Seminar, Michigan State University** "Toward a Unified Framework for Giant Planet Demographics" East Lansing, MI
- Sept. 2025 **Department of Earth Science & Environmental Change Colloquium, UIUC** "Diversity of Exoplanetary Worlds" Champaign, IL
- May 2025 **UCSB AstroLunch** "Origin of Hot Jupiters from the Stellar Obliquity Distribution" Santa Barbara, CA
- May 2025 **UCSC Plunch** "On the Initial Condition of Multiplanet Systems with Simulation-Based Inference" (Virtual)
- May 2025 **KITP Workshop: Planet Formation and Migration near the Inner Edge of Disks** Review on "Close-In Exoplanets: Where Observations Meet Theory" Santa Barbara, CA
- April 2025 **UH Institute for Astronomy** "On the Initial Condition of Multiplanet Systems with Simulation-Based Inference" Honolulu, HI
- April 2025 **Gemini North Talks** "On the Initial Condition of Multiplanet Systems with Simulation-Based Inference" Hilo, HI
- July 2024 **TDLI Frontier of Astrophysics Forum** "Origins and Diversity of Giant Planets" Shanghai, China
- April 2024 **ET Science Seminar** "Origins of Close-in Giant Planets" (Virtual)
- Mar. 2024 **Carnegie Observatories Colloquium** "Origins and Diversity of Giant Planets" Pasadena, CA
- Feb. 2024 **University of Illinois Urbana-Champaign Astrophysics Colloquium** "Origins and Diversity of Giant Planets" Urbana, IL
- Dec. 2023 **Nanjing University Exoplanet Seminar** "Five Years into TESS: A Comprehensive View of the Origins of Close-In Giant Planets" Nanjing, China
- Nov. 2023 **Columbia Seminar** "Uncovering the Origins of Close-In Giant Planets through Stellar Obliquity" New York, NY
- May 2023 **MIT TESS Science Talks** "Five Years into TESS: A Comprehensive View of the Origins of Close-In Giant Planets" Boston, MA
- Feb. 2023 **Princeton Exoplanet Seminar** "Understanding Close-in Planet Formation From Stellar Obliquities" Princeton, NJ
- Oct. 2022 **Yale Exoplanets and Stars Seminar** "Formation of Close-in Giant Planets: Where and How?" New Haven, Connecticut

- Feb. 2022 **Tsinghua Planet Group Meeting** "Origins of Warm Jupiters" Beijing, China
- Oct. 2021 **Princeton Exoplanet Seminar** "Tracing Dynamical Evolution of Planetary Systems" Princeton, NJ
- Oct. 2021 **Caltech Planetary Science Seminar** "Tracing Dynamical Evolution of Planetary Systems" Pasadena, CA
- Oct. 2021 **Berkeley Center for Integrative Planetary Science Seminar** "Tracing Dynamical Evolution of Planetary Systems" Berkeley, CA (Virtual)
- Oct. 2021 **Carnegie EPL Astronomy Seminar** "Tracing Dynamical Evolution of Planetary Systems" Washington, D.C. (Virtual)
- Sep. 2021 **CfA Seminar** "Tracing Dynamical History of TESS Warm Jupiters" Boston, MA (Virtual)
- Jan. 2020 **Tsinghua Planet Group Meeting** "Debris Disks in Multi-Planet Systems+TESS Warm Jupiters" Beijing, China

Conference Talks

- Dec 2025 **Exoplanets and Planet Formation 25** "Planet-Planet Scattering Explains the Origin of Warm Jupiters" Shanghai, China
- May 2024 **50 years of Binaries and Disks: Lubow@75** "Isotropic Stellar Obliquity Distribution of Hot Jupiter Systems" Las Vegas, NV
- Mar. 2024 **Extreme Solar Systems V** (Plenary) "Deciphering Origins of Close-in Gas Giants through Stellar Obliquity Distribution" Christchurch, New Zealand
- Jan. 2024 **ExoNYC** "From Super Earths to Super Jupiters: What stellar obliquity tells us about their formation" New York, New York
- Dec. 2023 **Exoplanets & Planet Formation Workshop** "Deciphering Origins of Hot Jupiters through Stellar Obliquity Distribution" Beijing, China
- Dec. 2023 **Open Problems in the Astrophysics of Gas Giants** "Deciphering Origins of Close-in Gas Giants through Stellar Obliquity Distribution" Patagonia, Chile
- July 2023 **Other Worlds Laboratory Summer Program** "Hot Jupiters: Dynamical Imprints Meet Atmospheric Mysteries" Santa Cruz, CA
- Oct. 2022 **TESS Science Meeting 29** "Using the NEID spectrograph to confirm the planetary nature of TOI-1859b via the Rossiter-McLaughlin effect" Boston, MA
- June 2022 **The 240th AAS Meeting** "Tracing Dynamical Evolution of Planetary Systems" Pasadena, CA (**Dissertation talk**)
- April 2022 **The 53rd DDA Meeting** "Two Case Studies of Warm Jupiters Suggesting Different Origins" New York, NY
- May 2021 **The 52nd DDA Meeting** "Boundary Layer Circumplanetary Accretion: How Fast Could an Unmagnetized Planet Spin Up Through Its Disk?" (Virtual, **Duncombe Prize Winner**)
- Jan. 2021 **TESS Science Meeting 24** "Warm Jupiters in Year 1 TESS Full-Frame Images: A Catalog and Observed Eccentricity Distribution" Boston, MA (Virtual)
- Nov. 2020 **Exoplanet Demographics I** "The Eccentricity Distribution and Occurrence Rates of Warm, Large Exoplanets" Pasadena, CA (Virtual)
- Aug. 2020 **The 51st DDA Meeting** "Unraveling Warm, Large Exoplanet (WaLE) Origins From TESS Observations" Ithaca, NY (Virtual)
- July 2020 **Exoplanets III** "A Catalog of Warm, Large Exoplanet (WaLE) candidates discovered in TESS Full Frame Images" Heidelberg, Germany (Virtual)
- June 2019 **Emerging Researchers in Exoplanet Science V** "Probing Young Planetary Systems from Their Debris Disks: Are Our Inferences Compromised by Unseen Planets?" Ithaca, NY
- June 2018 **Emerging Researchers in Exoplanet Science IV** "Investigating Young Planetary Systems Through Their Debris Disks" State College, PA

Seminars

Feb. 2023	CCA Thursday Lunch Talk "Close-in Giant Planets: Where, When, and How Do They Form?" New York, NY
June 2020	CCA Pre-Doctoral Symposium "Angular Momentum Transport in Circumplanetary Disks: How Much Could an Unmagnetized Planet Spin up Through Its Disk?" New York, NY (Virtual)
Nov. 2019	Penn State Astronomy Lunch Talk "Detection and Characterization of Warm Jupiters in TESS Full-Frame Images" State College, PA
Jan. 2019	Penn State Astronomy Lunch Talk "Probing Young Planetary Systems from Their Debris Disks: Are We Messed up by Unseen Planets?" State College, PA
Sep. 2017	Penn State Astronomy Lunch Talk "An ALMA Continuum Survey of the Protoplanetary Disks in the ρ -Ophiuchus Molecular Cloud" State College, PA

Conference Posters

June 2023	Gordon Research Conference "Stellar Obliquity Distribution of Exoplanetary Systems" South Hadley, MA
May 2022	Exoplanets IV "Two Case Studies of Warm Jupiters Suggesting Different Origins" Las Vegas, NV
Aug. 2021	TESS Science Conference II "The Eccentricity Distribution, Occurrence Rates, and Companions of TESS Warm Jupiters" Cambridge, MA (Virtual)
May 2021	Emerging Researchers in Exoplanet Science VI "In Situ versus Disk Migration Origins of Warm Jupiters: Prediction on Nearby Companions" (Virtual)
May 2021	The 52nd DDA Meeting "In Situ versus Disk Migration Origins of Warm Jupiters: Prediction on Nearby Companions" (Virtual)
Aug. 2019	Extreme Solar Systems IV "Probing Young Planetary Systems from Their Debris Disks: Are Our Inferences Compromised by Unseen Planets?" Reykjavik, Iceland
July 2019	TESS Science Conference I "Detection and Characterization of TESS Warm Jupiters" Cambridge, MA
May 2019	New Horizons in Planetary Systems "Probing Young Planetary Systems from Their Debris Disks: Are Our Inferences Compromised by Unseen Planets?" Victoria, BC (Poster Prize Winner)
July 2018	Sagan Exoplanet Summer Workshop "Investigating Young Planetary Systems Through Their Debris Disks" Pasadena, CA
Apr. 2016	University of Illinois Image of Research "Substructures of Protoplanetary Disks Revealed with ALMA Radio Observations" Champaign, IL

Teaching

Course Instructor	University of Illinois
ASTR 405: Planetary Systems (F25)	2025–present
Developed active-learning modules, problem sets, and research-based final projects	
Fluid Dynamics Summer School Lecturer	New York, NY
Flatiron Computational Fluid Dynamics for Astrophysics Summer School	2023
Gave a lecture about the application of grid-based code Athena++ in planet formation	
LSSTC DSFP Visiting Lecturer	Chicago, IL
LSSTC Data Science Fellowship Program	2022
Gave lectures on Bayesian inference , sampling methods , and PyMC applications to fellow graduate students in the Large Synoptic Survey Telescope Corporation (LSSTC) Data Science Fellowship Program (DSFP). 	
Sagan Workshop Hands-on Session Helper	Virtual
Sagan Exoplanet Summer Workshop	2021
- Led the hands-on session on circumstellar disk modeling using RADMC-3D (written by Faramaz et al.) in Zoom break-out rooms - Facilitated students to complete coding exercises	

Graduate Teaching Assistant

Elementary Astronomy; Fundamental of Planetary Science and Astronomy

State College, PA

2017, 18

- TA responsibilities including grading assignments, offering office hours, and proctoring exams
- Two guest lectures to roughly 150 students on "**The Solar System Formation**"
- One guest lecture to 5 students on "**Elementary Astronomy Lab**"

Grader and Observation Assistant

Champaign, IL

Introduction to Astrophysics

2016, 17

- Graded homework and exams for sophomore undergraduate students in Astronomy major
- Set up telescopes, monitored telescopes for safe use by students, and discussed celestial objects being observed during the evening and solar observing sessions

Mentoring

Graduate students

- 2026– **Feifan Deng**, University of Illinois Urbana-Champaign '31
- 2025– **Nicolas Mazziotti**, University of Illinois Urbana-Champaign '30, "A Bayesian Detection Pipeline for Long-Period Exoplanets in Gaia DR4"
- 2025– **Yuxuan Yuan**, Tsinghua University '31, "Inclination-Type Resonance of Close-in Giant Planets"
- 2024– **Lucas Brefka**, Pennsylvania State University '27, "Dynamics and Composition of a Sub-Saturn World"
- 2025–26 **Tyler Fairnington**, University of Chicago '30, "Radius-Dependent Eccentricity Distribution of TESS Planets", co-mentored with Prof. Chelsea Huang, one 1st-author paper
- 2023–25 **Michael Poon**, University of Toronto, "Planetary obliquity distribution", co-mentored with Profs. Bryan, Rein, & Speagle, one 1st-author paper
- 2024 **Brandon Radzom**, Indiana University '26, "Stellar obliquity of multi-planet systems", co-mentored with Prof. Songhu Wang, two 1st-author papers
- 2023–24 **Allyson Bieryla**, University of Southern Queensland '25, "Stellar obliquity measurement of TOI-2005", co-mentored with Profs. George Zhou and Chelsea Huang, one 1st-author paper
- 2022–23 **Kyle Hixenbaugh**, Indiana University '23, "Stellar obliquity measurement of TOI-5143", co-mentored with Prof. Songhu Wang, one co-author paper

Undergraduate and postbac students

- 2026– **Zixuan (Jay) Yan**, University of Illinois Urbana-Champaign '28, "Transiting Timing Variations of TESS Warm Jupiters"
- Fall 2025 **Team Gaia: Tanay Agrawal, Johnny Cheng, Grace Houlihan, Naavya Jain, Noori Khurshid, Ashi Poorey, Tanmay Raswant, Zixuan (Jay) Yan**. Team Gaia is a semester undergraduate research project focused on building a Bayesian inference pipeline to infer planetary companion properties from Gaia RUWE measurements .
- 2024–25 **Tyler Fairnington**, University of Southern Queensland '25, "Eccentricity Distribution of TESS Planets", co-mentored with Prof. Chelsea Huang, one 1st-author paper, now graduate student at University of Chicago
- 2024 **Jasmine Freeman**, Valdosta State University '25, "Eccentricity Distribution of Planets around Metal rich vs poor stars" via the Simons-NSBP program, now graduate student at University of Georgia
- 2021–22 **Claire DiPerna**, Penn State '24, "Dynamics of the resonant-chain system", co-mentored with Prof. Bekki Dawson
- 2021–22 **Jonathon Hope**, Penn State '24, "Migration of multiple giant planets", co-mentored with Prof. Bekki Dawson

Preliminary Exam Committee

- 2025 **Aadya Agrawal**, PhD Candidate, University of Illinois
- 2025 **Shiau-Jie Rau**, PhD Candidate, University of Illinois
- 2025 **Joseph Weller**, PhD Candidate, University of Illinois

Thesis Reviewer

August 21, 2026

Jiayin Dong · Curriculum Vitae

5

2024 **Nataliea Lowson**, PhD, University of Southern Queensland

Professional Activities

University Academic Service

- 2026– **Courses and Curriculum Committee**, Diversity and Inclusion Committee, Graduate Application Reader, Proficiency Exam Committee
- 2025–26 **Faculty Search Committee**, Graduate Application Reader, New Faculty Teaching Seminar (16-week program on evidence-based teaching practices), New Student Convocation Faculty Participant, Guest Lectures for ASTR 496: Research Introduction, ASTR 199: Panel on Academic Careers

Leadership

- 2025 **Founder and Organizer of the Machine Learning in Planetary System Dynamics Workshop** Initiated and organized the Machine Learning in Planetary System Dynamics workshop at CCA, Flatiron, bringing together experts in planetary system dynamics and machine learning to brainstorm and collaborate on next-generation interdisciplinary challenges.
- 2024–25 **Founder and Organizer of the Exoplanet Meeting** Initiated and organized the weekly Exoplanet Meeting at CCA, Flatiron to facilitate exoplanet-focused discussion on recent advances and peer mentoring.
- Fall 2019 **CEHW Journal Club Organizer** Organized weekly Astro-ph.EP group discussion for the Center for Exoplanets and Habitable Worlds (CEHW)

Core Organizer of the Emerging Researchers in Exoplanet Science (ERES) Symposium

- 2023 **Consultant for the 8th ERES Symposium (@Yale)** Provided expertise and guidance for the successful hosting of the ERES Symposium at Yale, drawing over 100+ in-person participants. This event contributed to the continued growth and development of emerging researchers in exoplanet science.
- 2022 **Chair of Organizing Committee for the 7th ERES Symposium (@Penn State)** Led the organization of the ERES Symposium at Penn State, securing \$100,000 in meeting funds from the Heising-Simons Foundation. The event brought together over 80 in-person participants, creating a platform for knowledge exchange and networking among junior researchers in the field of exoplanet science.
- 2021 **Organizing Committee Member for the 6th ERES Symposium (@Princeton)** Organized discussion panels focusing on career development and public engagement in astronomy. These panels served as a valuable resource for attendees, providing insights into career paths and ways to engage with the broader public.
- 2018 **Organizing Committee Member for the 4th ERES Symposium (@Penn State)** Involved in abstract selection and conference scheduling. Chaired the Planet Formation & Evolution session. Organized excursions, enhancing the overall experience of the conference participants.

Outreach

- 2026 **Astronomy on Tap Speaker** Gave an outreach talk on "Exoplanets"
- 2025 **Astrobit.es** Interviewed by Astrobit.es writer Maggie Verrico on the transition into a professorship. See the article: "The First Semester as Faculty: Interview with Professor Jiayin Dong"
- 2024 **Let's Talk Science** Discussed exoplanet science with curious NYC guests at Simons Foundation Presents Event "Imagining Other Worlds"
- 2024 **StarDate Magazine** Interviewed by the US magazine StarDate for an article about Hot Jupiters
- 2024 **Solar Viewing Volunteer** Delivering solar viewing sessions for parkgoers at Madison Square Park before and during the 2024 Total Solar Eclipse

- 2022, 17–19 **Featured Speaker; Exploring Exoplanets Demonstrator; The Guardian of Kid Prizes** at AstroFest (4-night outreach, 2500+ public visitors) & Astronight (1-night outreach, 500+ students)
- 2022 **Astronomy on Tap Speaker** Live coding Solar System dynamical interactions using N-body integrators

Reviewer

- 2023– **Journal Referee** for AJ (x4), MNRAS(x4), ApJL (x1), ApJS (x1), A&A (x1), & PASP (x1)
- 2024 **Panelist** for NASA-funded research programs
- 2023, 24 **External Panelist** served on CanTAC for the CFHT proposal (x2)
- 2023 **Panelist** for NASA-funded research programs
- 2020 **Panelist** on the Graduate School Information Session for Penn State undergraduate students
- 2020 **Moderator** for Exoplanets III; 950+ online participants; Coordinated with Transits 1 & 2 sessions
- 2019 **Executive Secretary** of NASA XRP Review Panel

Media & Press Release

- 2025 **“Giant super-Jupiter planets could have very chaotic pasts”** Featuring origins of super Jupiters by the **Space.com** (Dong, Chontos, Zhou+25, AJ)
- 2024 **“Colossal Planet in Rare Orbit Offers Clues to Origins of 'Hot Jupiters'”** Press release of the discovery of TIC-241249530b by the **NOIRLab; Simons Foundation; Penn State** (Gupta, Millholland, Im, Dong+24, Nature)
- 2023 **“New 'warm Jupiter' exoplanet has a weird orbit and another planet may be to blame”** Press release of the discovery of TOI-1859b by the **Space.com; phys.org** (Dong, Wang, Rice+23, ApJL)
- 2023 **“Hot Days and Cloudy Nights on a 'Heavy Metal' Exoplanet”** Press release of the JWST phase curve of WASP-121b by the **AAS Nova** (Mikal-Evans, Sing, Dong+23, ApJL)
- 2021 **“Worlds Away”** Featured article on circumplanetary accretion by the **Simons Foundation Annual Report** (Dong, Jiang, & Armitage 21, ApJ)
- 2021 **“Newly discovered gas giant moving closer to its star”** Press release of the discovery of TOI-3362b by the **ABC Southern Queensland; MINERVA-Australis Press; Eberly College Science News** (Dong, Huang, Zhou+21, ApJL)
- 2021 **AAS Journal Author Series** Interviewed by AAS Editor Frank Timmes about the TESS Warm Jupiter catalog and statistics (Dong, Huang, Dawson+21, ApJS)
- 2020 **“Detail in the Debris”** Featured article on debris disk modeling by the **Eberly College Science Journal** (Dong, Dawson, Shannon+20, ApJ)

Refereed Publications

Summary: 47 publications, 1105 total citations

† denotes students mentored by me

1st-Author Publications

- [1] **Dong**, Lee, Kokubo, Murray-Clay, et al. 2026, "Planet–Planet Scattering Explains the Mass–Eccentricity Relation of Warm Jupiters", *ApJL*, **1007**, L29 (cited: 1)
- [2] **Dong**, Chontos, Zhou, Stefánsson, et al. 2025, "Origins of Super Jupiters: TOI-2145b has a Moderately Eccentric and Nearly Aligned Orbit", *AJ*, **169**, 4 (cited: 7)
- [3] **Dong** & Foreman-Mackey 2023, "A Hierarchical Bayesian Framework for Inferring the Stellar Obliquity Distribution", *AJ*, **166**, 112 (cited: 54)
- [4] **Dong**, Wang, Rice, Zhou, et al. 2023, "TOI-1859b: A 64 Day Warm Jupiter on an Eccentric and Misaligned Orbit", *ApJL*, **951**, L29 (cited: 25)
- [5] **Dong**, Huang, Zhou, Dawson, et al. 2022, "NEID Rossiter-McLaughlin Measurement of TOI-1268b: A Young Warm Saturn Aligned with Its Cool Host Star", *ApJL*, **926**, L7 (cited: 23)
- [6] **Dong**, Huang, Zhou, Dawson, et al. 2021, "TOI-3362b: A Proto Hot Jupiter Undergoing High-eccentricity Tidal Migration", *ApJL*, **920**, L16 (cited: 43)
- [7] **Dong**, Jiang, & Armitage 2021, "Boundary Layer Circumplanetary Accretion: How Fast Could an Unmagnetized Planet Spin Up through Its Disk?", *ApJ*, **921**, 54 (cited: 24)
- [8] **Dong**, Huang, Dawson, Foreman-Mackey, et al. 2021, "Warm Jupiters in TESS Full-frame Images: A Catalog and Observed Eccentricity Distribution for Year 1", *ApJS*, **255**, 6 (cited: 44)
- [9] **Dong**, Dawson, Shannon, & Morrison 2020, "Debris Disks in Multiplanet Systems: Are Our Inferences Compromised by Unseen Planets?", *ApJ*, **889**, 47 (cited: 15)

2nd and 3rd Authored Publications

- [10] Vowell†, **Dong**, Rodriguez, et al. 2026, "The OATMEAL Survey – III. An aligned transiting warm brown dwarf and evidence for quiescent brown dwarf migration", *MNRAS*, **545**, staf2161 (cited: 7)
- [11] Fairnington†, **Dong**, Huang, et al. 2026, "The Orbital Eccentricity–Radius Distribution for Warm, Single Planets in TESS", *arXiv*, arXiv:2602.20015 (cited: 2)
- [12] Radzom†, **Dong**, Rice, et al. 2025, "Evidence for Primordial Alignment II: Insights from Stellar Obliquity Measurements for Hot Jupiters in Compact Multiplanet Systems", *AJ*, **169**, 189 (cited: 8)
- [13] Bieryla†, **Dong**, Zhou, et al. 2025, "TOI-2005b: An Eccentric Warm Jupiter in Spin-orbit Alignment", *AJ*, **169**, 273 (cited: 6)
- [14] Fairnington†, **Dong**, Huang, et al. 2025, "The eccentricity distribution of warm sub-Saturns in TESS", *MNRAS*, **540**, 1144 (cited: 6)
- [15] Radzom†, **Dong**, Rice, et al. 2024, "Evidence for Primordial Alignment: Insights from Stellar Obliquity Measurements for Compact Sub-Saturn Systems", *AJ*, **168**, 116 (cited: 24)
- [16] Mikal-Evans, Sing, **Dong**, Foreman-Mackey, et al. 2023, "A JWST NIRSpec Phase Curve for WASP-121b: Dayside Emission Strongest Eastward of the Substellar Point and Nightside Conditions Conducive to Cloud Formation", *ApJL*, **943**, L17 (cited: 47)

Co-Authored Publications

- [17] Taş et al. incl. **Dong** 2026, "An Earth-sized planet on a 5.4 h orbit around a nearby K dwarf", *A&A*, **707**, A238 (cited: 3)
- [18] Giovannazzi et al. incl. **Dong** 2026, "The NEID Earth Twin Survey. IV. Confirming an 89 days, $m \sin i = 10 M_{\oplus}$ Planet Orbiting a Nearby Sun-like Star", *AJ*, **171**, 286 (cited: 1)

- [19] Quinn et al. incl. **Dong** 2026, "TOI-2494 c and TOI-5143 c: A Hot Saturn and a Hot Jupiter with Interior Planetary Companions", AJ, **171**, 359 (cited: 3)
